## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments filed 5/30/08 have been fully considered and are found to be partially persuasive. The Examiner accepts Applicant's arguments regarding independent claims 1, 6, 11, and 12. However, the arguments regarding independent claims 5 and 10 are not persuasive. Applicant argues that the applied references do not teach the rotational frequency of the fan increasing in a ramp shape. However, the metes and bounds of the term "ramp shape" are extremely broad. Any increase from a low frequency to a higher frequency must follow some sort of path (or "ramp") to get to the higher frequency. Therefore the rejection of the previous office action stating that the "ramp" increase is an inherent feature of the frequency increase the DeWolf reference is considered proper.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yanigasawa in view of DeWolf et al. and Katsuki.

In view of the response to arguments set forth above, the rejection of these claims as set forward in the previous office Action is carried forward and maintained.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
